TRENDS IN
NEUROSCIENCES

REFERENCE EDITION

Volume 13

1990

CONTENTS

JANUARY

Research News
The myotonic mouse – a realistic model for the study of human recessive generalized myotonia, *by Reinhardt Rüdel* 1
The role of 'tumor suppressor' genes in neural tumors, *by Bernd R. Seizinger and Xandra O. Breakefield* 3

Obituary
John Treherne (1929–1989), *by John Nicholls, and by P. D. James* 7

Perspectives
The role of receptor subtype diversity in the CNS, *by Peter R. Schofield, Brenda D. Shivers and Peter H. Seeburg* 8

Letters to the Editor
Neural Edelmanism, *by George N. Reeke, Jr, and by Rick Michod* 11
Reply from Crick 13
Dextran amines in neuronal tracing, *by Bernd Fritzsch and Claudia Wilm* 14

Reviews
What mechanisms coordinate leg movement in walking arthropods?, *by Holk Cruse* 15
Cognitive function in Parkinson's disease: from description to theory, *by R. G. Brown and C. D. Marsden* 21
Molecular genetic studies of manic-depression and schizophrenia, *by Michael J. Owen and Michael J. Mullan* 29
Neurogenesis and sensitive periods in avian song learning, *by E. J. Nordeen and K. W. Nordeen* 31

Book Review
Cerebral Cortex, Vol. 7. Development and Maturation of Cerebral Cortex (edited by Alan Peters and Edward G. Jones), *by Giorgio M. Innocenti* 36

FEBRUARY

Research News
Making mouse muscle move, *by Christopher Henderson* 39
The enigma of the cortical code, *by Graeme Mitchison and Chris Miall* 41
Astrocyte heterogeneity, *by G. P. Wilkin, D. R. Marriott and A. J. Cholewinski* 43

Letters to the Editor
Excitatory amino acids and Parkinson's disease, *by Werner J. Schmidt, Michael Bubser and Wolfgang Hauber* 46
Reply from Klockgether and Turski 47

Reviews
Ion channel organization of the myelinated fiber, *by Joel A. Black, Jeffery D. Kocsis and Stephen G. Waxman* 48
From cornea to retinal image in invertebrate eyes, *by Dan-E. Nilsson* 55
Watching G proteins at work, *by Rainer Uhl, Rafael Wagner and Nicholas Ryba* 64
Viruses as transneuronal tracers, *by H. G. J. M. Kuypers and G. Ugolini* 71

Book Reviews
Brainstorming. The Science and Politics of Opiate Research (by S. H. Snyder), *by Patrick D. Wall* 76
Sensory Processing in the Mammalian Brain. Neural Substrates and Experimental Strategies (edited by Jennifer S. Lund), *by John Seal* 76
Neural Regeneration and Transplantation (Frontiers of Clinical Neuroscience Vol. 6), (edited by Frederick J. Seil), *by Avis H. Cohen* 77
Molecular Genetics in Diseases of Brain, Nerve and Muscle (edited by Lewis P. Rowland, Donald S. Wood, Eric A. Schon and Salvatore DiMauro), *by Duncan Shaw* 78

Books in Brief
Genetics of Neuromuscular Disorders (edited by Christos S. Bartsocas), *by Robert H. Brown* 79
Neuronal Grafting and Alzheimer's Disease (edited by F. Gage, A. Privat and Y. Christian), *by S. R. Whittemore* 79

MARCH

Research News
Highlighting *Aplysia*'s networks, *by Jennifer S. Altman and Jenny Kien* 81

Viewpoints
Amino acid neurotransmission: spotlight on synaptic vesicles, *by Peter R. Maycox, Johannes W. Hell and Reinhard Jahn* 83
Phantom limbs and the concept of a neuromatrix, *by Ronald Melzack* 88

Letters to the Editor
Identification of nicotinic receptor ACh-binding subunits, *by Stewart N. Abramson and Palmer Taylor* 92
Model for basal ganglia disorders, *by Roger Barker* 93
Role of the mesostriatal dopamine pathway, *by Philip G. Strange* 93
Reply from Albin *et al.* 94

Reviews
Category-related recognition defects as a clue to the neural substrates of knowledge, *by Antonio R. Damasio* 95
Intrinsic firing patterns of diverse neocortical neurons, *by Barry W. Connors and Michael J. Gutnick* 99
Hormonal control of neuropeptide gene expression in sexually dimorphic olfactory pathways, *by Richard B. Simerly* 104
Rod pathways in mammalian retinae, *by Nigel W. Daw, Ralph J. Jensen and William J. Brunken* 110

Book Reviews
Facets of Vision (edited by D. G. Stavenga and R. C. Hardie), *by Friedrich G. Barth* 115
Neuropeptides: A Methodology (IBRO Handbook Series: Methods in the Neurosciences Vol. 11) (edited by G. Fink and A. J. Harmar), *by J. Carnie* 116
Brain Opioid Systems in Reproduction (edited by R. G. Dyer and R. J. Bicknell), *by William R. Crowley* 117
Brain Messengers and the Pituitary (by E. E. Müller and Guiseppe Nisticò), *by F. A. Antoni* 118

APRIL

Research News
Ankyrin and the node of Ranvier, *by Anthony J. Baines* 119

Reviews
The G protein–channel connection, *by Paul C. Sternweiss and Iok-Hou Pang* 122
Muscle assembly in simple systems, *by John Jellies* 126
The use of cell lines in neurobiology, *by Urban Lendahl and Ronald D. G. McKay* 132
Memory traces in spinal cord, *by Jonathan R. Wolpaw and Jonathan S. Carp* 137
Retinoic acid, a developmental signalling molecule, *by Dennis Summerbell and Malcolm Maden* 142
Writer's cramp, *by C. D. Marsden and M. P. Sheehy* 148

Book Reviews
No Ghost in the Machine (by Rodney Cotterill), *by John C. Eccles* 154
Hearing. Physiological Acoustics, Neural Coding and Psychoacoustics (by W. Lawrence Gulick, Georges A. Gescheider and Robert D. Frisina), *by G. Rebillard* 154
The Bridge Between Neurology and Psychiatry (edited by E. H. Reynolds and M. R. Trimble), *by R. Porter* 155
The Computing Neuron (edited by Richard Durbin, Christopher Miall and Graeme Mitchison), *by Edward W. Kairiss* 156
Merritt's Textbook of Neurology (8th edn) (edited by Lewis P. Rowland), *by D. I. Graham* 157

Books in Brief
The Mind at Work: Psychological Ergonomics (by W. T. Singleton), *by Andy Whitefield* 158
Psychoactive Drugs: Tolerance and Sensitization (edited by A. J. Goudie and M. W. Emmett-Oglesby), *by J. L. Katz* 158

Books Received 159

MAY

Research News
The gamma wave: a cortical information carrier?, *by Steven L. Bressler* 161

Viewpoint
Do septal neurons pace the hippocampal theta rhythm?, *by Mark Stewart and Steven E. Fox* 163

Letter to the Editor
Neuroanatomical nomenclature, *by George Paxinos and Istvan Törk* 169

Reviews
Ion conductances affected by 5-HT receptor subtypes in mammalian neurons, *by Daniel H. Bobker and John T. Williams* 169
Development of the blood–brain barrier, *by Werner Risau and Hartwig Wolburg* 174
Riding the glial monorail: a common mechanism for glial-guided neuronal migration in different regions of the developing mammalian brain, *by Mary E. Hatten* 179
Regulation of cAMP-inducible genes by CREB, *by Marc R. Montminy, Gustavo A. Gonzalez and Karen K. Yamamoto* 184
Developmental neurobiology of salt taste sensation, *by David L. Hill and Charlotte M. Mistretta* 188

Book Review
Cortical Circuits: Synaptic Organization of the Cerebral Cortex. Structure, Function and Theory (by Edward L. White), *by Ivan Divac* 196

JUNE

Research News
Glucose-regulated potassium channels are sweet news for neurobiologists, *by Richard J. Miller* 197
Novel classes of nociceptors: beyond Sherrington, *by Stephen B. McMahon and Martin Koltzenburg* 199

Viewpoint
Pursuing the structure and function of voltage-gated channels, *by H. Robert Guy and Franco Conti* 201

Perspectives on Disease
Schizophrenia: the cellular biology of a functional psychosis, *by Gareth Wyn Roberts* 207

Reviews
The role of perireceptor events in chemosensory processes, *by William E. S. Carr, Richard A. Gleeson and Henry G. Trapido-Rosenthal* 212
Messenger molecules in the cerebellum, *by Christopher A. Ross, David Bredt and Solomon H. Snyder* 216
Multiple roles of a histaminergic afferent neuron in the feeding behavior of *Aplysia, by Hillel J. Chiel, Klaudiusz R. Weiss and Irving Kupfermann* 223
Cross-modal plasticity in cortical development: differentiation and specification of sensory neocortex, *by Mriganka Sur, Sarah L. Pallas and Anna W. Roe* 227

Book Reviews
Missing the Meaning? A Cognitive Neuropsychological Study of Processing of Words by an Aphasic Patient (by David Howard and Sue Franklin), *by Ruth Lesser* 234
Listening: an Introduction to the Perception of Auditory Events (by Stephen Handel), *by J. P. Wilson* 235
Nerve Growth Factors. (IBRO Handbook Series: Methods in the Neurosciences, Vol. 12) (edited by R. A. Rush), *by Ulrike Dohrmann* 235
Perspectives in Neural Systems and Behavior (MBL Lectures in Biology Vol. 10) (edited by Thomas J. Carew and Darcy B. Kelley), *by Ian R. Duce* 236
The Evaluation of Scientific Research (Ciba Foundation Conference) (edited by David Evered and Sara Harnett), *by Paul Cunningham* 237
Autonomic Failure: A Textbook of Clinical Disorders of the Autonomic Nervous System (2nd edn) (edited by Roger Bannister), *by William T. Talman* 238

Books in Brief
Modulation of Defined Vertebrate Neural Circuits (Annals of the New York Academy of Sciences Vol. 563) (edited by Michael Davis, Barry L. Jacobs and Ronald I. Schoenfeld), *by Frederick W. J. Cody* 239
Biosignal Transduction Mechanisms (edited by Michiki Kasai, Tohru Yoshioka and Hideo Suzuki), *by John A. Dani* 239
The Electromyographer's Handbook (2nd edn) (by Rajesh K. Sethi and Lowery Lee Thompson), *by K. M. Bennett* 239

Membrane Structure and Function ('In Focus' Series) (by W. H. Evans and J. M. Graham), *by José D. Cavieres* 240
Molecular Mechanisms of Alcohol: Neurobiology and Metabolism (edited by Grace Y. Sun, P. Kevin Rudeen, W. Gibson Wood, Yau Huei Wei and Albert Y. Sun), *by Richard G. Lister* 240

JULY

Special issue – Basal Ganglia Research

Introduction
New frontiers in basal ganglia research, *by P. S. Goldman-Rakic and L. D. Selemon* 241

Reviews
Neurotransmitters and neuromodulators in the basal ganglia, *by Ann M. Graybiel* 244
Extrinsic connections of the basal ganglia, *by André Parent* 254
The neural network of the basal ganglia as revealed by the study of synaptic connections of identified neurones, *by A. David Smith and J. Paul Bolam* 259
Functional architecture of basal ganglia circuits: neural substrates of parallel processing, *by Garrett E. Alexander and Michael D. Crutcher* 266
Interactions between glutamatergic and monoaminergic systems within the basal ganglia – implications for schizophrenia and Parkinson's disease, *by Maria Carlsson and Arvid Carlsson* 272

Centrefold
Connections of the Basal Ganglia in Primates, *by Lynn D. Selemon* C1–C4

Disinhibition as a basic process in the expression of striatal functions, *by G. Chevalier and J. M. Deniau* 277
Primate models of movement disorders of basal ganglia origin, *by Mahlon R. DeLong* 281
Excitotoxic injury of the neostriatum: a model for Huntington's disease, *by Marian DiFiglia* 286
Compensations after lesions of central dopaminergic neurons: some clinical and basic implications, *by Michael J. Zigmond, Elizabeth D. Abercrombie, Theodore W. Berger, Anthony A. Grace and Edward M. Stricker* 290
Visual deficits related to dopamine deficiency in experimental animals and Parkinson's disease patients, *by I. Bodis-Wollner* 296
PET imaging of dopamine receptors in human basal ganglia: relevance to mental illness, *by Göran Sedvall* 302

Books Received 308

AUGUST

Research News
Tug-of-war at the neuromuscular junction, *by Donald Wigston* 309

Viewpoint
Brief seizure episodes induce long-term potentiation and mossy fibre sprouting in the hippocampus, *by Yehezkel Ben-Ari and Alfonso Represa* 312

Perspectives
Improving cooperation between East and West Europe in neuroscience, *by Steven Rose* 319

Techniques
Patch-clamping in slices of mammalian CNS, *by Arthur Konnerth* 321

Letters to the Editor
Neostriatal dopamine receptors, *by J. De Keyser and G. Ebinger* 324
Reply from Strange 324
Excitatory amino acid antagonists and Parkinson's disease, *by Jean-Antoine Girault, Shelley Halpain and Paul Greengard* 325
Reply from Klockgether and Turski 326
Reply from Schmidt, Bubser and Hauber 327
Neurogenesis and learning, *by Bernd Fritzsch and M-D. Crapon de Caprona* 328

Reviews
The cellular basis of segmentation in the developing hindbrain, *by Andrew Lumsden* 329
Molecular approaches to the segmentation of the hindbrain, *by David G. Wilkinson and Robb Krumlauf* 335

The Korsakoff syndrome: a neurochemical perspective, *by William J. McEntee and Robert G. Mair** 340
Target regulation of neurotransmitter phenotype, *by Story C. Landis* 344

Book Reviews
Neurobiology of Glycoconjugates (edited by Richard U. Margolis and Renée K. Margolis), *by Samuel H. Barondes* 351
Elements of Molecular Neurobiology (by C. U. M. Smith), *by Hermona Soreq* 351
The NMDA Receptor (edited by J. C. Watkins and G. L. Collingridge), *by Bengt Gustafsson* 352
Speaking. From Intention to Articulation (by Willem J. M. Levelt), *by David Caplan* 353
Magnetic Resonance of Myelin, Myelination and Myelin Disorders (by J. Valk and M. S. van der Knaap), *by Charles M. Poser* 354
Neuroanatomy of the Oculomotor System (Reviews of Oculomotor Research Vol. 2) (edited by J. A. Büttner-Ennever), *by I. M. L. Donaldson* 355
The Neurobiology of Saccadic Eye Movements (Reviews of Oculomotor Research Vol. 3) (edited by R. H. Wurtz and M. E. Goldberg), *by I. M. L. Donaldson* 355
Modeling Brain Function: The World of Attractor Neural Networks (by Daniel J. Amit), *by A. de Callataÿ* 357
The Motor Cortex (by Hiroshi Asanuma), *by Anthony J. Castro* 358

Books Received 358

* See errata

SEPTEMBER

Research News
Rapid membrane effects of steroid hormones: an emerging concept in neuroendocrinology, *by Michael Schumacher* 359

Perspectives
Olfactory neurogenesis: genetic or environmental controls?, *by Albert I. Farbman* 362

Letters to the Editor
Comparisons of neocortex and hippocampus, *by Helen E. Scharfman* 365
Reply from Connors and Gutnick 365
Perivascular microglia defined, *by Manuel B. Graeber and Wolfgang J. Streit* 366

Reviews
Actions of identified neuromodulatory neurons in a simple motor system, *by Paul S. Katz and Ronald M. Harris-Warrick* 367
Aspects of the structure of the D_2 dopamine receptor, *by Philip G. Strange* 373
Calcium and the mechanism of light adaptation in vertebrate photoreceptors, *by Gordon L. Fain and Hugh R. Matthews* 378

Book Reviews
Sodium–Calcium Exchange (edited by T. Jeff A. Allen, Denis Noble and Harald Reuter), *by Paul Schnetkamp* 385
Foundations of Cognitive Science (edited by Michael I. Posner), *by Alan Garnham* 385
Principles of Cellular, Molecular, and Developmental Neuroscience (by Oswald Steward), *by Judy K. Brunso-Bechtold* 386
The Olivocerebellar System in Motor Control (Experimental Brain Research Series, 17) (edited by Piergiorgio Strata), *by M. Glickstein* 387

Book in Brief
Lesion Analysis in Neuropsychology (by Hanna Damasio and Antonio R. Damasio), *by Klaus Poeck* 388

Books Received 388

OCTOBER

Research News
Epigenesis and plasticity in the nervous system, *by Alex M. Thomson* 389

Viewpoint
The color-opponent and broad-band channels of the primate visual system, *by Peter H. Schiller and Nikos K. Logothetis* 392

Perspectives
Neurobiology a century ago at the Marine Biological Laboratory, Woods Hole, *by Jane Maienschein* 399
Brain maps and parallel computers, *by Mark E. Nelson and James M. Bower* 403

Letters to the Editor
Is there a genetic component to body schema?, *by John R. Skoyles* 409
Hippocampal potassium ATP channels and anoxia: presynaptic, postsynaptic or both?, *by Y. Ben-Ari* 409

Reviews
Colliding saccades may reveal the secret of their marching orders, *by John Schlag and Madeleine Schlag-Rey* 410
How might the diversity of potassium channels be generated?, *by Lily Yeh Jan and Yuh Nung Jan* 415
The cannabinoid receptor: biochemical, anatomical and behavioral characterization, *by Allyn C. Howlett, Michelle Bidaut-Russell, William A. Devane, Lawrence S. Melvin, M. Ross Johnson and Miles Herkenham* 420
The use of molecular techniques in studying viral pathogenesis in the nervous system, *by Peter G. E. Kennedy* 424

Book Reviews
The Neurobiology of Memory: Concepts, Findings, Trends (by Yadin Dudai), *by Christine Logan and Richard F. Thompson* 431
Disorders of Movement. Clinical, Pharmacological and Physiological Aspects (edited by N. P. Quinn and Peter G. Jenner), *by Lysia S. Forno* 432
The Workings of the Brain. Development, Memory and Perception (edited by Rodolfo R. Llinás), *by Raymond Lund* 433
Neurosim: A Neurophysiology Simulation Package for IBM PC (by W. J. Heitler), *by Chris Miall and Ken Stratford* 433
Synesthesia. A Union of the Senses (by Richard E. Cytowic), *by Lawrence E. Marks* 434
Parallel Distributed Processing: Implications for Psychology and Neurobiology (edited by R. G. M. Morris), *by Gezinus Wolters* 435
Methods in Neuronal Modelling. From Synapses to Networks (edited by Christof Koch and Idan Segev), *by Eric L. Schwartz* 436

Books Received 437

NOVEMBER

Research News
c-*Fos* and the changing face of pain, *by Maria Fitzgerald* 439

Viewpoint
How might the motor cortex individuate movements?, *by Marc H. Schieber* 440

Letters to the Editor
Cortical circuits reviewed, *by Neil J. Berman and Kevan A. C. Martin* 445
Reply, from Ivan Divac 446

Reviews
A common denominator of growth cone guidance and collapse?, *by Jochen Walter, Timothy E. Allsopp and Friedrich Bonhoeffer** 447
Myelin-associated inhibitors of neurite growth and regeneration in the CNS, *by Martin E. Schwab* 452
Effects of melatonin on vertebrate circadian systems, *by Vincent M. Cassone* 457
Regulatory sites in the melatonin system of mammals, *by Diana N. Krause and Margarita L. Dubocovich* 464

Book Reviews
The Physiology of the Compound Eyes of Insects and Crustaceans [by Sigmund Exner (transl. by Roger C. Hardie)], *by Dan-E. Nilsson* 470
Gene Probes (Methods in Neurosciences, Vol. 1) (edited by P. Michael Conn), *by Noel J. Buckley* 471

* See errata

DECEMBER

Research News
A GABA transporter cDNA has been cloned, *by Michael J. Kuhar* 473

Perspectives
Corticospinal, rubrospinal and rubro-olivary projections: a unifying hypothesis, *by Philip R. Kennedy* 474

Viewpoint
Keeping cool: a hypothesis about the mechanisms and functions of slow-wave sleep, *by Dennis McGinty and Ronald Szymusiak* 480
Is the cerebral cortex modular?, *by N. V. Swindale* 487

Reviews
Genes required for specifying cell fates in *Drosophila* embryonic sensory nervous system, *by Yuh Nung Jan and Lily Yeh Jan* 493
Presynaptic inhibition of muscle spindle and tendon organ afferents in the mammalian spinal cord, *by P. Rudomin* 499

Book Reviews
Brain Imaging: Techniques and Applications (edited by N. A. Sharif and M. E. Lewis), *by J. M. Polak* 506
The Comparative Physiology of Regulatory Peptides (edited by Susanne Holmgren), *by Marcello Costa* 506
Brain Browser™: a Hypercard® Application for the Macintosh® (by Floyd E. Bloom, Warren G. Young and Yung M. Kim), *by Greg Campbell* 507
Visual Pattern Analyzers (Oxford Psychology Series, No. 16) (by Norma van Surdam Graham), *by Karen K. De Valois* 508

Books in Brief
Molecular Neurobiology (edited by D. M. Glover and B. D. Hames), *by John Hardy* 509
Migraine: A Spectrum of Ideas (edited by Merton Sandler and Geralyn Collins), *by D. I. Wallis* 509

ERRATA

The Korsakoff syndrome: a neurochemical perspective, *by William J. McEntee and Robert G. Mair* (August, pp. 340–344) 446

A common denominator of growth cone guidance and collapse?, *by Jochen Walter, Timothy E. Allsopp and Friedrich Bonhoeffer* (November, pp. 447–452) 479
